

IBIMAR[®]
BLAST EQUIPMENT

MARITIME

Lightweight aluminium blasting for the marine industry

IBIMAR® units are the premier blast systems and are indispensable for every professional working in the boating and ship-building industry. Perfectly suited for decontamination and cleaning, removal of grease, oil residue, paint, carbon deposits or glue, from machinery and utensils.

Economical, versatile and safe for the environment

Lightweight aluminium construction make our units a portable one-man operation. Every unit is equipped with rollers for easy portability. IBIMAR® units are user friendly and deliver a precise, consistent even air and media flow for a smooth surface finish with very low air volume requirements. Minimal dusting improves health and safety for the operator and the environment.

Off-shore maintenance Extending the life of marine vessels and off-shore platforms. Removes contaminants and tough marine coatings from offshore platforms, jack up oil rigs, industrial, military and commercial ships, carriers, passenger ferries and tankers.

On board marine maintenance unit

- Bilges, ballast tanks, cofferdams and engineering spaces.
- Areas typically prohibitive to abrasive blasting (near hydraulics, electronics, seal and bearings).
- Corrugated steel, non-ferrous metal surfaces, tie downs, deck perimeters and compartments.
- Sump pits, rudder stocks, tiller extensions, transom and rudder fitting scuppers, bridge wings.
- Storage facilities: lube oil tanks, water tanks.
- Propellers and flaps.
- Removal of soot contamination.

Other applications include:

- Cleaning and polishing teak floors with garnet mineral and sodium bicarbonate.
- Polishing aluminium and stainless steel structures with sodium bicarbonate.
- Deck winches, wing bridges, hatch covers, any other support maintenance.

Air consumption

In order to achieve the desired results, it is important that the compressor has sufficient capacity. When the IBIMAR® is used for spot-repair, a small compressor is often enough. If you have one or more buffer tanks the use of a small compressor is also sufficient. The suggested pressure for blasting on board is between 4 and 6 bar. The air consumption per nozzle is shown below.

	1 bar	2 bar	3 bar	4 bar	5 bar	6 bar	7 bar	8 bar	9 bar	10 bar
Ø 2 mm	37	74	111	147	185	222	259	295	332	369
Ø 2,5 mm	58	115	173	231	289	346	404	462	519	577
Ø 3 mm	80	170	250	330	420	500	580	660	750	830
Ø 4 mm	150	300	440	590	740	890	1030	1180	1330	1480
Ø 4,5 mm	187	374	561	748	935	1122	1309	1496	1683	1870
Ø 5 mm	230	460	690	920	1150	1380	1620	1850	2080	2310
Ø 5,5 mm	279	559	838	1117	1396	1676	1955	2234	2513	2793
Ø 6 mm	330	660	1000	1330	1660	1990	2330	2660	2990	3320

Optimal equipment available for all IBIX units

Sieve

For recycling of the blastmedia

Protecting mask

Comfortable mask including P3-filter and re-changeable glasses

Dust Reduction

Vacuum head attachment available.

Spytze Ventilator

Dust extraction for small areas

Extended Lance

Available for all units. Perfect for overhead work and tight places.

Additional Nozzle Kits

Available for Ibimar 9 & 25

We are committed to protecting the environment for the next generation

IBIMAR® E500 electrocompressor

2 x 220 volt 500 l/min

See our demonstration-video below

IBIMAR®

If the rust is not completely removed it will come back over and over again. The IBIMAR® system is your solution to corrosion problems! Not only the removal of rust is easier to realize. Using an Ibimar assures you that the rust will be removed for 100%. So a new painting system could hold for decades because of the right surface.

Want to know if the IBIMAR® system is also suitable for you? We are more than happy to give you a demonstration and show you the benefits of the IBIX® system. In this demonstration we invite you to try the blasting system yourself.

Of course it is possible to just receive the information needed. Just contact your local distributor for more information and advice.

Why IBIMAR®?

- Handy and lightweight.
- Easy to drive through small areas.
- Significant time savings compared to traditional rust-removing methods.
- Improved quality of work in less time.
- 100% rust removal so it protects the steel for decades after good preservation.
- Also hard to reach places, seams, etc. are 100% clean after using the Ibimar.
- Everybody can use this "easy to use-system"
- Maintenance-free and lightweight aluminum blastpot.
- Ecological.
- Immediate ready to work.
- 5 year manufacturer's warranty.
- Low air capacity.
- Dustless blasting possible with dustextraction or water

Please contact your distributor for advice.
