IBIX® 25P H2O

Fully made of aluminium, manageable and easy to transport, the IBIX® 25 cleaning system is extremely versatile and can be used with ease by just one worker.

IBIX® H2O offers two different operating modes: dry or with a nebulized low-pressure water jet mixed with the abrasive. The mix happens in the nozzle so that the quantity of water used is reduced, along with the cleaning residues and the cost of protecting nearby areas. The use of water prevents dust to spread in the surroundings and is perfect in urban contexts or similar.

The H2O method is versatile and can be used for different purposes such as restoration, urban cleanliness, graffiti removal, industrial cleaning and maintenance.

The IBIX® 25P H2O is designed for intensive professional use and can be used for the following applications:

- Facade cleaning.
- Graffiti removal.
- Yacht maintenance.
- Different cleaning tasks.

Technische gegevens

Weight:	28 kg
Dimensions h x w:	940 mm x 450 mm
Standard nozzle:	Ø 5,5 mm cylindrical
Other available nozzles:	Cylindrical Ø 3 - 4 - 5,5 - 7 Conical Ø 4 - 5 - 6
Compressed air volume requirements:	Minimum 53 cfm
Blasting medium-air hose with protective sheath:	10 m
Blasting medium tank capacity:	25 lt
Pressure:	From 0.2 to 7 bar
