IBIX® 9f2

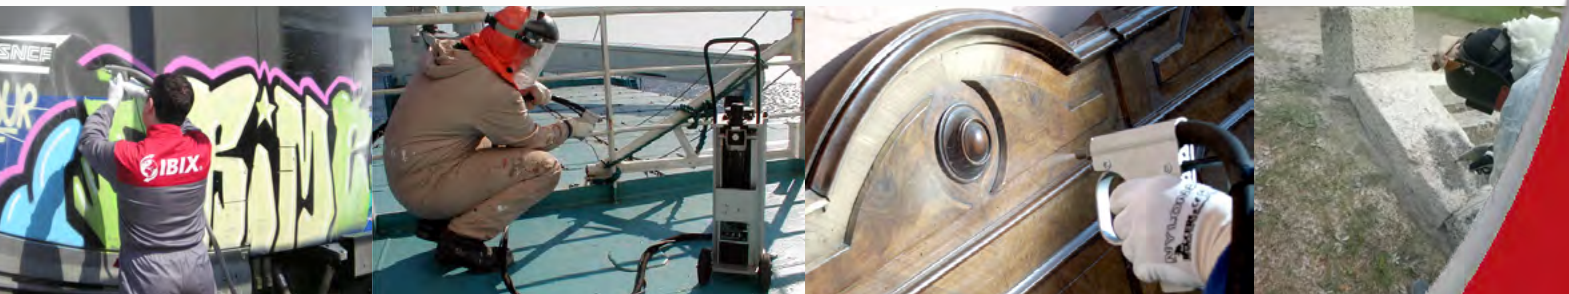

Fully made of aluminium, manageable and easy to transport, the IBIX® cleaning system is extremely versatile and can be used with ease by just one worker.

Being able to choose the most appropriate blasting material and adjust blasting pressure makes this a multipurpose system capable of providing unequalled performance in innumerable fields of application, all in full observance of worker safety and environmental safeguard standards.

The IBIX® 9f2 is designed for intensive professional use and can be used for the following applications:

- Paint and rust removal on board.
- Mobile blasting work in the industry.
- Paint and wax removal of wood and furniture.
- Mobile graffiti removal.

Technische gegevens
