IBIX® Ibimar 9

Fully made of aluminium, manageable and easy to transport, the IBIX® cleaning system is extremely versatile and can be used with ease by just one worker.

The ecological dry system is ideal to treat wood and porous stones on which using water is not recommended; it can successfully be used in fields where a particularly strong abrasive power is required, such as paint removal for yacht maintenance.

Being able to choose the most appropriate blasting material and adjust blasting pressure makes this a multipurpose system capable of providing unequalled performance in innumerable fields of application, all in full observance of worker safety and environmental safeguard standards.

The IBIX® Ibimar 9 is designed for intensive professional use and can be used for the following applications:

- Paint and rust removal on board.
- Mobile blasting work in the industry.
- Paint and wax removal of wood and furniture.
- Mobile graffiti removal.

Technical data

Weight:	12 kg
Dimensions h x w:	850 mm x 430 mm
Standard nozzle:	Internal Ø 3 mm cylindrical nozzle
Other available nozzles:	Cylindrical Ø 1.5 - 2 - 2.5 - 3.5 - 4 - 4.5 Conical Ø 2.5 - 4
Compressed air volume requirements:	Minimum 18 cfm
Blasting medium-air hose with protective sheath:	6 m
Blasting medium tank capacity:	9 lt
Pressure:	From 0.2 to 7 bar
